The 23rd edition of Lamiera, Italy's only trade fair dedicated exclusively to sheet metal, tube, and profile processing technologies, concluded on May 9 at Fieramilanone Area with positive attendance figures. The four-day event attracted more than 18,000 professional visitors, along with over 6,000 additional attendees from the concurrently held Made in Steel exhibition, thanks to a cooperative access agreement.

Organized by CEF – Centro Espositivo Uchim and promoted by Uchim – Sistemi per Produrre, the fair featured over 400 exhibitors – 31 percent of them international – across a 40,000-square-metre space. Technologies on display included more than 500 operating machines covering cutting, forming, welding, automation, and, for the first time, retrofitting solutions. The event received ISO 20121:2024 certification, recognising its sustainable management practices.

International interest was notable, with visitors from 72 countries, particularly from Germany, China, Turkey, and India. Delegations were organised with the support of the Italian Ministry of Foreign Affairs and ICE-Italian Trade Agency.
